

# The 11th General Meeting of the Japanese Society of Gastroenterology

## Congress Name

The 11th General Meeting of the Japanese Society of Gastroenterology

## Dates

April 24 (Thu.) – 26 (Sat.), 2025

## Venue

Keio Plaza Hotel Tokyo

## President

Takanori Kanai, M.D., Ph.D.  
Department of Internal Medicine  
(Gastroenterology and Hepatology),  
Keio University School of Medicine

## Secretariat

Department of Internal Medicine  
(Gastroenterology),  
Keio University School of Medicine

# Presidential Address

**Takanori Kanai, M.D., Ph.D.**  
**Department of Internal Medicine (Gastroenterology and Hepatology),**  
**Keio University School of Medicine**

We are pleased to announce that the 111th General Meeting of the Japanese Society of Gastroenterology will be held over a 3-day period from Thursday April 24 through Saturday April 26, 2025 at the Keio Plaza Hotel Tokyo in Shinjuku. Established in 1898, the Japanese Society of Gastroenterology has witnessed remarkable growth since its inaugural meeting in 1899, proudly celebrating its 100th meeting in 2014. It is a great honor to serve as the president at this 111th general meeting of this society with a long history and tradition. This occasion will mark the first time in 14 years that our department will host the general meeting since Professor Toshifumi Hibi took office as president at the 97th meeting in 2011. My colleagues and I have totally dedicated ourselves to preparing for this momentous event.

This meeting takes “Interconnections Among Organs in Gastroenterology” as its main theme. Gastroenterology itself encompasses various organs including the digestive tract, liver and biliary and pancreas thus highlighting the field’s diversity. Each organ possesses unique structural and functional characteristics, necessitating its own tailored diagnostic and therapeutic approaches. Given the intricate relationships among these organs, taking a holistic approach from fundamental research to clinical application, is crucial. We therefore believe it essential to adopt a multidisciplinary perspective that emphasizes the interconnectedness of these organs rather than simply applying a narrow focus on one specialty. The crosstalk between organs within the digestive system, mediated by the nervous, endocrine, immune, circulatory, and metabolic systems, is essential for maintaining homeostasis, thus facilitating an understanding of the disease pathogenesis. Advances in gastroenterology are essential for improving human health. We want this meeting to serve as a platform for examining gastroenterology from a comprehensive standpoint and foster the creation of knowledge leading to innovative diagnostic and therapeutic strategies. In addition to special and invited lectures, this 111th General Meeting of the Japanese Society of Gastroenterology will present an exceptional project entitled “Proposals for the Development of Physician Scientists from Each Generation.” The international session will focus on “Advances in Gastrointestinal and Hepato-Pancreato-Biliary Immune-Mediated Inflammatory Diseases.” This meeting will encompass a total of 45 thematic sessions, including 15 sessions each of dedicated symposiums, panel discussions, and workshops. In our endeavor to internationalize the meeting, we will introduce a novel initiative featuring 4 English-language symposium sessions. We extend our heartfelt gratitude to the officers, councilors of the Society, and members of the program committee for their invaluable support in planning and organizing this prestigious event.

As the poster for this meeting, I have chosen to feature the work “Ruddy Kingfisher by the Sea in Early Summer” by the esteemed Japanese painter Isson Tanaka, with the gracious permission of his family. At the age of 50, Isson Tanaka relocated to Amami Oshima, my grandfather’s hometown and a place closely tied to my family roots. Through his meticulous observations and remarkable artistic talent, he captured the essence of Amami Oshima’s natural beauty in his exquisite flower and bird paintings, crafting a unique and enchanting vision. Tanaka’s dedication to exploring new motifs and unwavering commitment to his own distinctive style is something that deeply resonates within all of us as researchers. My hope is that this general meeting will serve as a fertile ground for you to discover your own new motifs that foster innovation and creativity in your work.

# Call for Abstracts

## Abstract Submission Period

July 31 (Wednesday) to Noon, September 20 (Friday), 2024 (Japan Time)

## Session Type and Category

### <Symposium>

- ◆ Broad look at immunity, inflammation, and metabolism involving the digestive organ crosstalk
- ◆ Recent Advances in Minimally Invasive Endoscopic Treatment for Gastrointestinal Tumors
- ◆ Systemic therapies for advanced hepatocellular carcinoma
- ◆ Current Status and Future Prospects for Management of Acute and Chronic Pancreatitis

### <Free Paper (Oral Session)>

#### ◆ Category A

01	Basic research	02	Clinical research	03	Case study
----	----------------	----	-------------------	----	------------

#### ◆ Category B

01	Esophagus	02	Stomach/duodenum	03	Small intestine	04	Colon and rectum
05	Liver	06	Biliary tract	07	Pancreas	08	Other

#### ◆ Category C

01	Epidemiology	02	Pathology	03	Diagnosis	04	Internal medicine treatment
05	Surgical treatment	06	Endoscopic treatment	07	Prevention	08	Other

#### ◆ Category D

01	GERD	02	Esophageal cancer	03	H. pylori	04	Gastric cancer
05	Ulcer	06	IBD	07	Microbiome	08	IBS
09	Gastrointestinal bleeding	10	EMR/ESD	11	Capsule endoscope	12	Tumor of the small intestine
13	Colon cancer	14	Hepatitis B	15	Hepatitis C	16	MASLD/MASH
17	Alcoholic liver disease	18	AIH/PBC	19	Acute hepatitis/ Liver failure	20	Portal hypertension
21	Liver cirrhosis	22	Liver cancer	23	Acute pancreatitis	24	Chronic pancreatitis
25	Autoimmune pancreatitis	26	PSC	27	Pancreatic cancer	28	IPMN
29	NET	30	Bile duct cancer	31	Other malignant tumors	32	Benign tumor
33	Inflammation	34	Infection	35	Stones	36	Gastrointestinal motility
37	Regeneration	38	Chemotherapy	39	Immune-related adverse event	40	Epidemiology
41	Gastrointestinal problems in older patients	42	Hereditary disease	43	Other		

## Submission Guidelines

Please refer to Call for Abstracts (Abstract Submission) page of the 111th JSGE official website.

\* Abstracts can only be submitted via online. Please note that abstracts sent by email, by post or by FAX will not be accepted.

## Notification of Abstract Acceptance

Notification of acceptance or rejection will be announced by email at the end of January 2025 to the email address you registered when submitting your abstract. The detailed information about presentation schedule, such as date and place, is going to be mentioned in the notification of acceptance.
