No.	Travel Grant	Session	Abstract No.	演題名
386		Poster Session	01395	The mechanism of resistance to Trifluridine (FTD) induced by decreased deoxythymidylate kinase (DTYMK) in gastric cancer cells.
387		Oral Session	01396	Tenascin C in tumor stroma is a predictive marker for recurrence in upper gastrointestinal cancers
388		Poster Session	01397	Recurrence after ESD curative resection for early gastric cancer
389		Poster Session	01398	The role of staging laparoscopy in cM+ patients
390	•	Oral Session	01399	Analysis of Hospital Costs for Robotic and Open Gastrectomy at a Cancer Center
391		Oral Session	01400	Predictors of Long-term Outcomes of Endoscopic Submucosal Dissection of Early Gastric Neoplasia in the West
392		Poster Session	01402	Short-term outcomes of robot-assisted and laparoscopic proximal gastrectomy for cancer in a single-center Japanese institution
393 394		Poster Session	01403	Relationship between TRPV2 and PD-L1 expression in gastric cancer and its clinical significance
394 395		Oral Session Oral Session	01404 01405	A short-term outcome of Minimally Invasive Surgery for treating advanced gastric cancer after preoperative chemotherapy Laparoscopic versus open gastrectomy for advanced gastric cancer patients who underwent neoadjuvant chemotherapy: multicenter study based on Korean gastric cancer association nationwide survey
396		Poster Session	01405	Surgical resection for focally progressive peritoneal metastatic/recurrent GISTs of the stomach treated with imatinib/sunitinib therapy
397		Oral Session	01407	Cost-effectiveness of multi-degree of freedom articulating laparoscopic instrument in gastric cancer surgery compared with robotic gastrectomy: Phase II study in a single center
398		Poster Session	01408	MUC1 expressions and its prognostic values in US gastric cancer patients
399		Poster Session	01409	Analysis of the Occurrence of Diseases Following Gastrectomy for Early Gastric Cancer: a Nationwide Claims Study
400		Oral Session	01410	Development of an artificial intelligence system in laparoscopic gastrectomy for gastric cancer
401		Poster Session	01411	Feasibility of the three-port right-side approach duet totally laparoscopic approach in total gastrectomy to treat gastric cancer
402		Poster Session	01412	Current status of remnant gastric cancer in our institution, from the perspective of ways of reconstruction in the initial gastrectomy, Billroth-I versus Billroth-II.
403		Poster Session	01413	Pancreatic volume and pancreatic secretory function are decreased by gastrectomy in gastric cancer patients
404 405		Oral Session Poster Session	01414 01415	No leakage in 100 cases of RDG delta anastomosis ~ Blood flow evaluation method by ICG using the Fire Fly function~ A case of complete response to chemotherapy containing trastuzumab for HER2-positive gastric cancer.
406		Scientific Program (Oral)	01415	A randomized phase II study comparing S-1 plus oxaliplatin with S-1 monotherapy for elderly patients with advanced gastric cancer: WJOG8315G
407		Poster Session	01417	PROXIMAL GASTRECTOMY WITH DOUBLE-TRACT RECONSTRUCTION FOR A GASTROINTESTINAL STROMAL TUMOR OF THE ESOPHAGO-GASTRIC JUNCTION : HOW WE DO IT IN THE WEST
408		Poster Session	01418	OUTCOMES OF ADJUVANT CHEMOTHERAPY WITH S-1 FOR ELDERLY GASTRIC CANCER PATIENTS
409		Poster Session	01419	Oncological and nutritional feasibility of laparoscopic subtotal gastrectomy for gastric cancer in the upper gastric body
410		Poster Session	01420	Laparoscopic surgery for remnant gastric cancer
411		Poster Session	01421	A deferasirox-based iron nanochelator for gastric cancer therapy
412		Oral Session	01422	Para-aortic lymph node dissection for large type 3 or type 4 gastric cancer with extensive lymph node metastasis
413		Poster Session	01423	MORTALITY RISK OF MINIMALLY INVASIVE GASTRECTOMY FOR GASTRIC CANCER IN THE VERY ELDERLY
414		Oral Session	01424	Significance of minimally invasive surgery for very elderly gastric cancer patients
415		Oral Session	01425	Adjuvant nab-paclitaxel + S-1 versus capecitabine + oxaliplatin in patients with stage III gastric adenocarcinoma after D2 radical resection
416 417		Oral Session Poster Session	01427 01428	Defining the age-dependent characteristics of gastric cancer using Prefectural Cancer Registry Data Mechanism of Helicobacter pylori CagA promotes gastric cancer immune escape through p53 regulating exosomal PD-L1
417		Poster Session	01428	Preoperative weight loss program for obese patients with early gastric cancer: a single-institution prospective study
419		Poster Session	01430	Technique and short-term results of robot-assisted proximal gastrectomy with reconstruction by double-flap esophagogastric anastomosis
420		Poster Session	01431	Simultaneous robotic distal gastrectomy and distal pancreatectomy: how to avoid total gastrectomy
421		Oral Session	01432	Intraoperative portable radiography for tumor localization of gastric cancer: a novel technique to enhance accuracy and convenience
422		Poster Session	01433	Subtotal gastrectomy with small remnant stomach improves surgical outcome and long-term QOL in resectable GC
423		Poster Session	01434	DEEP LEARNING RADIO-CLINICAL SIGNATURES FOR PREDICTING NEOADJUVANT CHEMOTHERAPY RESPONSE AND PROGNOSIS FROM PRETREATMENT CT IMAGES OF LAGC PATIENTS: A MULTICENTER STUDY
424		Poster Session	01435	Role of surgery versus endoscopic resection among patients with small well differentiated gastric neuroendocrine tumor
425		Oral Session	01436	Clinical impact of positive surgical margins in gastric adenocarcinoma in the era of preoperative therapy
426		Scientific Program (Oral)	01437	Trends and outcomes of oncologic robotic gastrectomy in the United States
427 428		Poster Session Poster Session	01438 01439	Survival result of gastrectomy plus adjuvant S-1 therapy for type 4 or large type 3 gastric cancer with CY1 Short- and long-term outcomes of laparoscopic or robotic radical gastrectomy based on preoperative perigastric artery CTA surgical decision-making
429		Oral Session	01439	The effects of ERAS versus conventional protocol on clinical outcome in gastric cancer patients underwent radical gastrectomy: a pilot study on relevant mechanisms
430		Poster Session	01441	Left thoracoabdominal esophagectomy for esophagogastric cancer
431		Scientific Program (Oral)	01442	Preoperative invasion depth diagnosis of ulcerated early gastric cancer and endoscopic submucosal dissection after ulcer treatment: a retrospective study
432		Poster Session	01443	Impact of postoperative NSAIDs (IV-PCA) use on short-term outcomes after laparoscopic gastrectomy for the patients of gastric cancer
433		Poster Session	01444	A Novel TNFAIP8L1-based Nomogram for Predicting Overall Survival in Stage II and III Colon Cancer.
434		Oral Session	01445	Intraoperative performance and outcomes of robotic and laparoscopic total gastrectomy for gastric cancer: a high-volume center retrospective propensity score matching study
435		Oral Session	01446	Randomized Controlled Trial Comparing the Short-term Outcomes of Enhanced Recovery After Surgery and Conventional Care in Laparoscopic Distal Gastrectomy (GISSG1901)
436		Scientific Program (Oral)	01447	Randomized Controlled Trial Comparing the Short-term Outcomes of Enhanced Recovery After Surgery and Conventional Care in Laparoscopic Distal Gastrectomy (GISSG1901)
437		Oral Session	01448	Hand-sewn robotic assisted esophagogastric anastomosis during minimally invasive Ivor Lewis esophagectomy: is it time to standardize the technique? The Pavia proposal
438 439		Poster Session Oral Session	01449 01450	Characteristics of early gastric cancer detected by linked color imaging after white light imaging Patient-reported and clinical outcomes of locally advanced gastric cancer undergoing robotic versus laparoscopic gastrectomy: a high-volume single center randomized controlled study
439 440		Poster Session	01450	Correlation and clinicopathological value of integrin alphavbeta6 and Rac1 expression in gastric cancer
441		Oral Session	01452	Impact of complications on survival after laparoscopic versus open D2-gastrectomy for gastric cancer assessed using Comprehensive Complication Index and Clavien-Dindo grading (LOGICA-trial).
442		Poster Session	01453	Analysis of prognostic factors for adenocarcinoma of the esophagogastric junction (AEG)
443		Oral Session	01454	Preliminary report of Non-exposure simple suturing endoscopic full-thickness resection (NESS-EFTR) for early gastric cancer (SENORITA 3 phase 2 study)
444		Oral Session	01455	Surgical quality and prospective quality control of D2-gastrectomy for gastric cancer in the multicenter LOGICA-trial
445		Poster Session	01456	Feasibility of staging laparoscopy for detecting peritoneal recurrence for gastric cancer after gastrectomy: Multi-institutional prospective study
446		Scientific Program (Oral)	01457	The multimodal therapy mainly on the molecular target agencies for metastatic GIST
447		Scientific Program (Oral)	01458	Development of prediction model of intra-abdominal infectious complication after gastrectomy with machine learning
448 449		Oral Session	01459	Intralesional cross-traction assisted gastric endoscopic submucosal dissection with silicon bands
449 450		Poster Session Poster Session	01460 01461	Hemostatic ability of spray coagulation mode in endoscopic submucosal dissection for early gastric neoplasms Toddler Growth Analysis Using the K-Means++ Algorithm to Determine the Risk of Obesity
450 451		Poster Session Poster Session	01461	Nivolumab combination chemotherapy for unresectable HER2-negative advanced or recurrent gastric cancer
452		Oral Session	01463	Clinical Progress in Inoperable or Recurrent Advanced HER2-positive Gastric Cancer Treatment from Single Institute Experiences Between 2011 and 2018
453		Poster Session	01464	Outcome of combination chemotherapy with Nivolumab as the first line for unresectable advanced or recurrent gastric cancer.
454		Poster Session	01465	A study protocol for effect of preoperative CT angiography examination on laparoscopic gastrectomy (GISSG 20-01 Study)
455		Poster Session	01466	Results of palliative irradiation for unresectable advanced gastric cancer patients.
456		Scientific Program (Oral)	01467	Effect of preoperative CT angiography versus standard assessment on the short-term outcome of patients with BMI ≥ 25.0 kg/m² undergoing laparoscopic gastrectomy(GISSG20-01)
457		Poster Session	01468	The first report of MSI-H gastric cancer with neuromyelitis optica treated by concurrent nivolumab and satralizumab
458		Poster Session	01469	Our experience of chemotherapy with nivolumab for unresectable gastric cancer.
459		Poster Session	01470	Brain-only metastasis and 10-year survival after curative gastric cancer resection: a case report
460		Poster Session	01471	Clinical outcome of left thoracotomy for large submucosal tumor of the esophagogastric junction.
461 462		Poster Session	01472 01473	Perioperative chemotherapy for Gastric and Esophagogastric junctional cancer in community hospital Early experience of neoadjuvant chemotherapy for locally advanced gastric cancer at Intermed hospital
+02		Poster Session	014/0	carry experience or neodujuvant chemounerapy for locally duvanced gastric cancer at intermieu hospital
